

Regarding Air1 102.7 or 92.7 FM in Gresham Troutdale area. I really enjoy this music station and it serves me and my family in a huge way! We enjoy listening to positive music that is rockin without all the nasty words or negative images that you find in all secular music! This station also serves our Christian Community and helps us as young adults listen to awesome Christian Music! If Air1 was replaced we would not have a station to listen to. It would leave us musicless and not allow us to enjoy the music we are able to hear everyday. I would be very sad and it would leave us with nothing to hear. I believe that Air1 is a awesome public interest because children can listen to music that will not harm them or place violent negative images in their minds. This music station serves our community in a big way by encouraging young adults to enjoy a christ center lifestyle or a lifestyle centered around love, truth, and hope! It also helps the hurting people in our community realize that there is someone out there who can help them or lead them in a better direction. Last week there was a woman who called in to Air1 who was very suicidal and just hearing them talk about God and tell her that there is someone out there who loves her, saved her life. It was amazing to hear that, and I do not know what would have happened to hear if this music station was not playing at the time or on the air. Please consider what I have written and keep the air1 in our local community!
